

# APACHE SPARK

### **INTRODUCTION**

#### **COURSE HIGHLIGHTS**

- > Extensive, In-depth & Comprehensive
- Use cases and Hands on based
- Designed as per market requirements that covers
  - Batch Processing
  - Real-time Streaming
  - In-memory processing
  - > RDBMS Datastore
  - Columnar & Document Datastore
  - Visualization and Dashboard
- Latest Versions
  - > Spark 2.2.0 Scala 2.11.1 Java 1.8.0 Hadoop 2.7.1 Hive 1.2.2 Cassandra 3.9.0
    - ElasticSearch 5.0.1 Kibana 5.0.1 Kafka 0.10 Nifi 1.5.0 Centos 7
- End to End System Integration
  - > Acquire -> Transport -> Queue -> Transform -> Enrich -> Lookup -> Stream -> Load -> Visualize
- Performance Tuning

#### **COURSE AGENDA**

- BIG DATA Overview
- Hadoop Architecture
- Spark Basics
- Scala and its programming implementation
- Spark Execution Model
- Working with RDDs
- > Spark Essentials
- > Spark Distribution Setup and Configurations
- Running Spark on Cluster
- Writing Spark Applications
- RDD Operations in detail
- > Interactive Data Analysis with Spark Shell
- Spark API for different File Formats& Compression Codecs
- Caching and Persistence

- Improving Spark Performance
- > Spark Core Real-time Use cases
- Exploring Spark SQL
- > SQL Realtime Usecases
- Exploring Spark Streaming
- Streaming Realtime Usecases
- Spark Machine Learning
- MLLib Realtime Usecases
- ➤ Kafka Messaging Queue
- Kafka Realtime Usecases
- Elastic Search Document Datastore
- Elastic Search Realtime Usecases
- Kibana
- Kibana Realtime Usecases
- ➤ End to End Project on realtime Fleet tracking analysis with spark streaming application, Kafka, NIFI, Cassandra, Elastic Search and Kibana Dashboard

**INCEPTEZ TECHNOLOGIES** 

### Use cases & Projects that we execute in this complete course

- Server Log Analysis
- Retail Banking
- Consumer Product sales analysis
- Federated Data lake
- Movie Dataset Analysis
- Slowly Changing Dimension using Spark SQL
- Streaming Log files storage
- Consumer pricing usecase
- Twitter popular hashtag trending analysis
- Sensor data streaming pipeline
- > Spam Filtering Analysis
- Uber Data Analysis
- ➤ End to End Project on realtime Fleet tracking analysis with spark streaming application, Kafka, NIFI, Cassandra, Elastic Search and Kibana Dashboard.

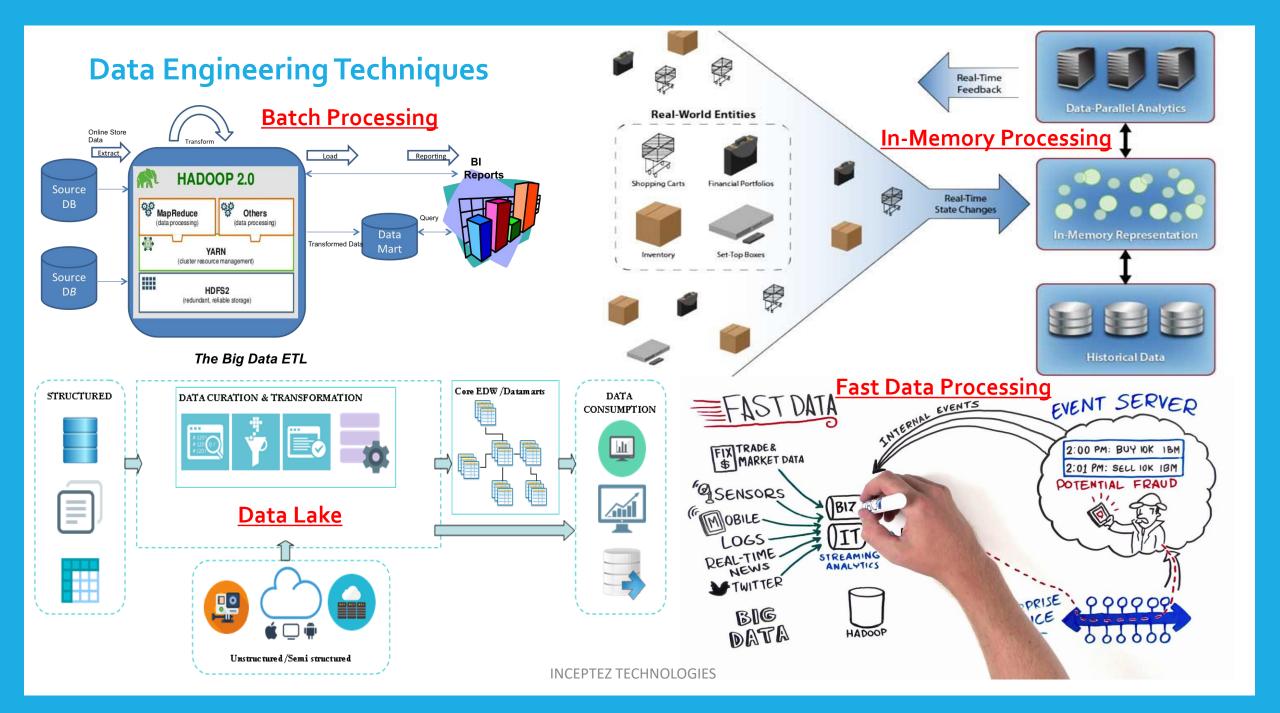

#### **BIG DATA**

- Introduction
- Characteristics

### **Distributed System**

- Distributed storage
- Distributed processing

**Resource Management** 

Distributed computation

> Network - connect to talk each other

#### Hadoop 1.0

**HDFS - Distributed Storage** 

Map/Reduce - Resource Management and distributed processing

#### Hadoop 2.0

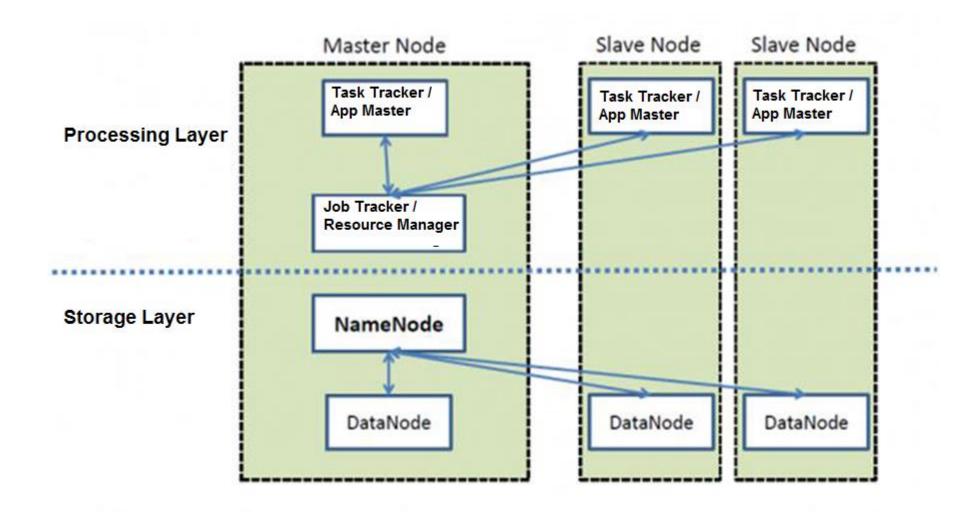

**HDFS** - Distributed storage

**Distributed Processing** 

**YARN** - Resource Management

Map/Reduce - Distributed Processing

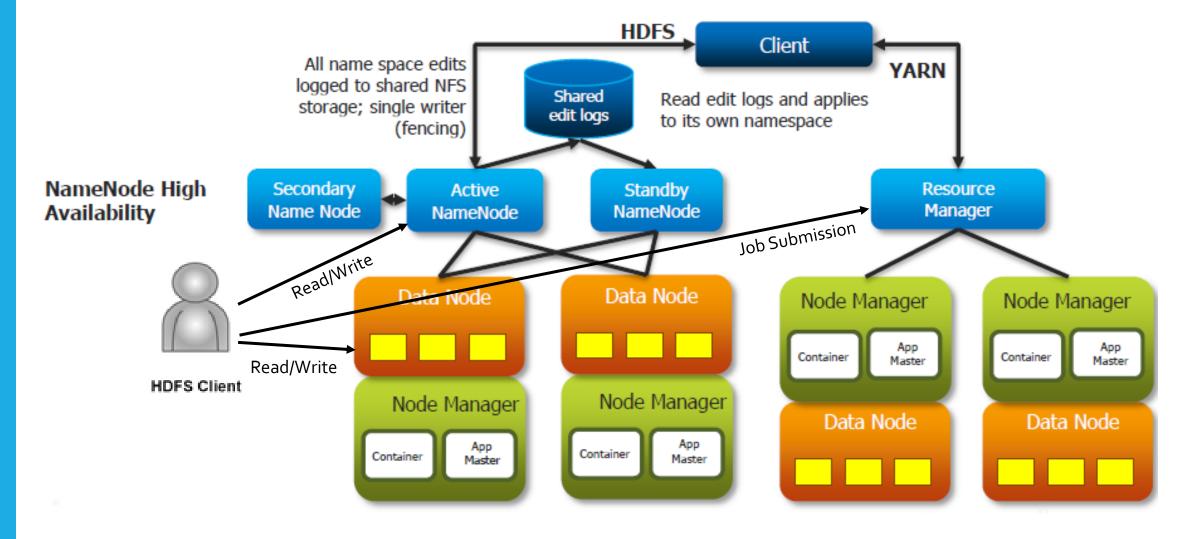

### **High Level Architecture of Hadoop**

### **Hadoop Properties**

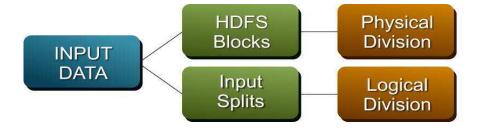

- > File System
- > Immutability
- **≻**Replication
- **▶** Data Locality
- > Fault Tolerance
- **≻**Scalability
- **▶**Batch Processing

#### Hadoop – A Quick Overview

## Map/Reduce Characteristics

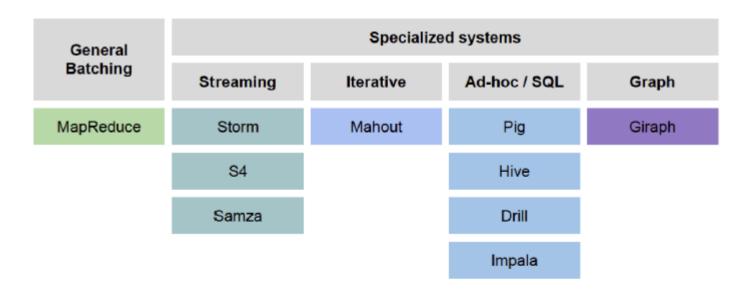

- **▶** Block Split /Input Split
- **≻**Driver
- Mapper
- **≻**Reducer
- **≻**Combiner
- **≻**Partitioner

#### Map Reduce Flow MAP Phase **REDUCE Phase** Partition, Sort & Shuffle, Merge & Sort Reducer Input Split Map Spill Map<sub>1</sub> Spill<sub>1</sub> (Hadoop,1) (Dscience,1) Split 1 (SAP,1) (Dscience,1) (Infa,1) (Dscience,1) (Hadoop,1) Hadoop SAP Infa (SAP,1) (Dscience,1) (Hadoop,1) SAP (Dscience,1) (Dscience,1) (Infa,1) **DScience ORACLE** (ORACLE,1) (Dscience,1) (JAVA,1) Spark (Spark,1) (Hadoop,1) (ORACLE,1) **Hadoop Dscience** (Hadoop,1) (Dscience,(1,1 (Hadoop,1) JAVA (SAP,1) (Dscience,1) (Hadoop,1) (Dscience,4) ,1,1)) (SAP,1) (JAVA,1) (Hadoop,(1,1, (Hadoop, 6) (Hadoop,1) (Spark,1) (Infa,1) (Hadoop,1) 1,1,1,1) (JAVA,2) (Infa,1) (Hadoop,1) (ORACLE,1) (Infa,1) (JAVA,(1,1)) Spill<sub>2</sub> Map<sub>2</sub> Split 2 (ORACLE,1) (SAP,2) (JAVA,1) (Spark,1) (JAVA,1) (SAP,(1,1))(Dscience,1) (Spark,1) (TD,2) (ORACLE,1) Hadoop Hadoop (Hadoop,1) (Dscience,1) (SAP,1) (TD,(1,1)) **JAVA** (Hadoop,1) (Hadoop,1) (SAP,1) Hadoop DScience TD (JAVA,1) (Hadoop,1) (Spark,1) Hadoop TD Dscience (Hadoop,1) (Hadoop,1) (TD,1) (Dscience,1) (Hadoop,1) (TD,1) (TD,1) (JAVA,1) (Hadoop,1) (TD,1) (TD,1) (TD,1) (Dscience,1) Input (K1, V1) List (K2, V2) List (K2, V2) ( K2, List ( V2)) List (K2, V2) List (K<sub>3</sub>, V<sub>3</sub>)

#### **Hadoop Ecosystems – No Unified Vision**

- > Sparse Modules
- **▶** More of Batch
- Diversity of Tools/APIs
- > Huge coding efforts
- ➤ Heavily I/O Bounded
- High Latency

#### **Hadoop & Spark Approach**

- Hadoop introduced a radical new approach based on two key concepts
  - Distribute the data when it is stored
  - Run computation where the data is
- Spark takes this new approach to the next level
  - Data is distributed in memory
